## Latest generation Cloud computing & multiple rewards by efficient blockchain

With the latest generation of shared intelligent hardware, you can join OneThing Rewards Program, share idle bandwidth with easy operation, and enjoy the rewards of Crypto-token (LinkToken).

### OneThing Rewards Program

Get richer by sharing idle network bandwidth, storage space and computing resources, latest generation intelligent device by OneThing cloud.

### LinkToken

Time is money. Huge demand and limited supply of LinkToken ,designed by XunLei. Join today to benefit more.XunLei unveils the latest cloud and blockchain, crowd sourced computing to reward its earliest participants.

Note: OneThing Rewards Program is a rewarding scheme for OneThing Cloud owners, but not the main, sole, indispensable function and performance of OneThing Cloud device. Whether or not to join OneThing Rewards Program does not affect users' normal use of the equipment.

**Your data security is guaranteed by exclusive encrypted data transmission channels**

With the exclusively owned cloud disk, your personal photos and business documents and other personal secrets can be safely stored; and no more worrying about data leakage.

Easy File Access Anytime

Exclusive Cloud Space

Prevention of Data Leakage

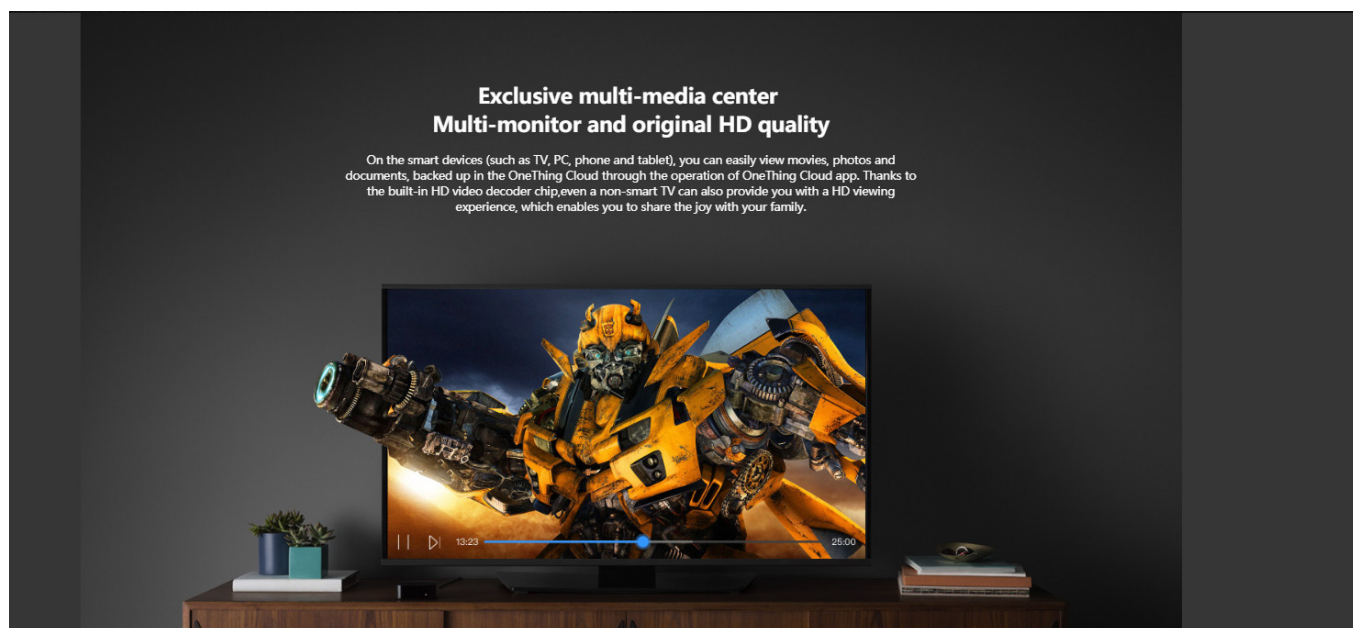

Worry-free Security

Unique Protection Algorithm

Leading encrypted computing, ensures all data is transmitted through the encrypted channel. No third party cloud server is involved. Your privacy and confidentiality is guaranteed.

We employ custom paragon file protection system, to ensure safety and ultimate security to every bit of your data and information on your hard disk, and serves you as "most highly protected personal data bank".

## Unmatched features for best data management

1GB RAM + 8GB ROM, Quad-core 1.5G processor, HD decoder chip, supporting gigabit network; strong high-performance drivers bring you free and enjoyable use experience.

1GB Ethernet port  
extra-large network port, speedy  
transmission

1GB DDR3  
extra-large cache space, more stable  
running

CPU 4-core 1.5GHz  
Quad-core processor, fast processing of  
data

USBx2  
expansion of cloud space at any time

HD decoding chip  
HD play, supporting non-smart TVs
